

Resident/Owner

For sewage designs submitted to Northeast Tri County Health District and installation of on-site sewage systems, the definition of resident/owner will be expanded. The Health District will allow on-site sewage system design and installation by the property owner and/or the immediate family member, however, either the property owner or the immediate family member must be the occupant of the residence.

Immediate family member is defined as: parents, children, brothers, sisters, grandparents, grandchildren.

One of the following statements must be signed by the property owner and immediate family member. This can be a separate document or part of the sewage system design.

I _____, property owner of a parcel of land described as _____, Section _____, Township _____, Range _____, _____ County, Washington, give my permission for _____, _____, to design and/or install an (family member name) (relationship to property owner) on-site sewage system on this property.
