

## **Financial Assistance for On-Site Sewage System Repairs**

In partnership with Rural Resources Community Action, Northeast Tri County Health District has established a financial assistance program to repair existing on-site sewage systems in Ferry, Pend Oreille, and Stevens Counties.

The program's priority is to provide financial assistance to help homeowners repair failing on-site sewage systems that pose a public health risk or a risk to ground and surface water quality.

The program offers low interest loans with long term repayment periods. Flexible repayment options are available for those who qualify. Loan amounts can cover 100% of the cost for designing and installing a new sewage system.

To find out more information or to apply, contact the Housing Division at Rural Resources at 509-684-8421.
